

### ABSTRACT OF THE DISCLOSURE

A program signal is recorded on a recording medium. The program signal is reproduced from the recording medium. First time information is generated in accordance with lapse of time.

- 5 Second time information is generated from the reproduced  
program signal. The second time information represents one of (1)  
a time at which the program signal was recorded and (2) a time at  
which the program signal was broadcasted. On-screen information  
is superimposed on the reproduced program signal. The on-screen  
10 information represents (1) a picture portion indicative of a time, (2)  
a first mark positionally corresponding to the first time information,  
and (3) a second mark positionally corresponding to the second  
time information.
